

Design, Maintenance and Certification of Experimental Aircraft

At this event we will begin with a discussion of the benefits of the FAASafety.gov website and how to use it. We will also take a look at local accidents, which were caused by maintenance errors in an effort to prevent the same type of mistakes from reoccurring. And finally, we will discuss what you need to do to apply for an airworthiness certificate and learn how to avoid some common pitfalls in the application process, including certification documentation, FAA records and the aircraft inspection process. This event is open to EAA Chapter 988 members and their guests only, please contact Stewart Beck for details.

Directions: Please see Additional Public Documents for a map of the EAA Chapter 988 hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area
